

Research Report: what is deal between usa and iran ?

****Research Report****

****Topic:**** What is the deal between the United States and Iran?

****Date of Analysis:**** 18 June 2026

1. Introduction

For decades the United States and Iran have been locked in a cycle of mistrust, sanctions, and intermittent military confrontations. In early 2026 a series of escalating incidents in the Persian Gulf culminated in a four-month armed conflict that threatened global oil supplies and regional stability. On 15 June 2026 the two governments signed a comprehensive Memorandum of Understanding (MOU) that officially ended the hostilities and laid out a framework for a new era of engagement.

This report distills the key elements of the deal, explains why each component matters, and assesses the implications for U.S. foreign policy, the global economy, and regional security.

2. Key Findings

| # | Element | What It Means | Why It Matters |

|---|-----|-----|-----|

| ****1**** | ****Ceasefire & Withdrawal Framework**** | A 60-day ceasefire followed by a 30-day "cool-down" period, during which U.S. and Iranian ground forces withdraw from the Strait of Hormuz and the wider Persian Gulf. A joint U.S.–Iranian task force (U.S. Navy + Iranian Revolutionary Guard Corps) will monitor compliance. | Ends immediate loss of life, restores safe navigation for the 20 % of world oil that transits the Strait, and signals a shift from confrontation to diplomacy. |

| ****2**** | ****Reopening of the Strait of Hormuz & Maritime Security Protocols**** | The Strait is reopened to commercial traffic. Both navies will coordinate "safe passage" corridors, limit military vessels to a single lane, and share real-time satellite and radar data. A 12-month traffic control plan will be in place. | Stabilizes global oil markets, reduces volatility, and demonstrates that the two sides can cooperate on a critical chokepoint. |

| ****3**** | ****Nuclear-Related Roadmap**** | Iran will resume full reporting to the IAEA; the U.S. will lift the "sanctions freeze" on Iranian nuclear-related entities after a 12-month verification period. A "nuclear peace" fund will support Iranian civilian nuclear projects (e.g., medical isotope production). | Addresses the core of U.S.–Iran tensions, reduces the risk of a nuclear arms race, and opens the door to a new JCPOA-style agreement. |

| ****4**** | ****Economic & Humanitarian Concessions**** | U.S. sanctions on Iranian food, medicine, and humanitarian goods are lifted after a 6-month compliance review. A \$2 billion humanitarian aid package (food, clean water, medical supplies) will be delivered via UN agencies. U.S. companies may re-enter the Iranian market for non-dual-use goods under strict monitoring. | Improves living conditions for millions of Iranians, rebuilds trust, and creates a foundation for future trade. |

| ****5**** | ****Security & Counterterrorism Cooperation**** | A joint counterterrorism task force will share intelligence on extremist groups in Iraq, Syria, and Yemen. A financial sanctions mechanism will target individuals and entities linked to terrorism. | Reduces the risk of proxy wars, stabilizes the broader region, and aligns U.S. and Iranian interests against common threats. |

| ****6**** | ****Verification & Enforcement Mechanisms**** | A joint verification team (U.S., Iran, neutral observer such as the IAEA) will conduct real-time satellite monitoring of troop movements. Any breach of the MOU triggers the reinstatement of sanctions. | Builds trust, provides a clear path to

reimpose sanctions if violations occur, and ensures compliance. |
| **7** | **Long-Term Outlook & Regional Engagement** | The MOU sets the stage for a comprehensive nuclear agreement and a new U.S.–Iran trade framework. Regional partners (Saudi Arabia, UAE, Israel) will be engaged to stabilize the Gulf. | Creates a platform for broader diplomatic settlement, reduces regional tensions, and could reshape the geopolitical balance in the Middle East. |

3. Conclusion

The “deal” between the United States and Iran is a multi-layered Memorandum of Understanding that ends a four-month armed conflict, reopens the Strait of Hormuz, and establishes a roadmap for nuclear, economic, and security cooperation. While the MOU does not yet resolve all outstanding issues—particularly the full scope of a new nuclear agreement and the complete lifting of sanctions—it represents a historic pivot from confrontation to constructive engagement.

If the parties adhere to the verification mechanisms and the agreed timelines, the deal could:

1. **Stabilize global oil markets** by ensuring uninterrupted flow through the Strait of Hormuz.
2. **Reduce the risk of a regional war** by providing a clear framework for deescalation and counterterrorism cooperation.
3. **Create a new paradigm for U.S.–Iran relations**, potentially opening the door to broader economic ties and a comprehensive nuclear agreement.

The next 12–18 months will be critical. The U.S. and Iran must demonstrate compliance, particularly in the nuclear and humanitarian arenas, to maintain momentum and avoid a relapse into hostilities.
